PROJECT EXECUTABLE FILES

Field	Details
Date	10 October 2026
Team ID	SWTID-2026-4750
Project Name	Auto Ticket Classification using FLOW DESIGNER
Maximum Marks	3 Marks

Step 1: Submission Checklist

Statuses are marked pending where project files or links were not provided.

S.No	Item to Submit	Status
1	Complete source code / flow configuration	Pending
2	README / setup guide	Pending
3	Dependency file, if applicable	N/A / confirm
4	Database schema / seed files, if applicable	N/A / confirm
5	Environment configuration example, if applicable	N/A / confirm
6	Deployed application URL	Not provided
7	APK / executable binary, if applicable	N/A
8	Dockerfile / containerization config, if applicable	N/A / confirm
9	Test files and test results	Pending
10	Demo video / walkthrough	Pending

Step 2: File / Folder Structure

Suggested organization — update the entries to match the actual files used.

Item	Purpose
Flow Designer flow	Trigger, conditions, classification logic and actions
Sample ticket records	Test records used to verify classification
Screenshots / demo recording	Evidence of flow configuration and execution
README / setup notes	Instructions for reviewing and testing the project

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not provided — add the authorized ServiceNow instance URL
Demo credentials	Not provided; share securely if required
Platform / Hosting	ServiceNow Flow Designer
Repository Link	Not provided
Demo Video Link	Not provided

Step 4: Run Instructions

1. Sign in to the authorized ServiceNow instance.

2. Open Flow Designer and locate the Auto Ticket Classification flow.

3. Review the trigger, conditions, classification rules and configured actions.

4. Use an approved sample ticket to trigger the flow.

5. Review the execution details and verify the ticket classification result.

6. Capture test screenshots and record any errors.

Note: Exact steps depend on the configured instance and flow.

Step 5: Known Issues / Limitations

No.	Issue / limitation	Workaround / status
1	Classification rules were not provided in the request.	Document the implemented rules.
2	Instance URL and access details are missing.	Add authorized details before submission.
3	Test results were not supplied.	Run tests and attach evidence.
