Auto Ticket Classification using FLOW DESIGNER

Team ID	SWTID-2026-4750
Project Name	Auto Ticket Classification using FLOW DESIGNER

Customer Journey Map

Maximum Marks: 2 Marks

Journey Phase	Stage 1: Submit Ticket	Stage 2: Classify Ticket	Stage 3: Resolve / Route
Actions	User submits a support ticket.	Ticket is automatically classified using FLOW DESIGNER.	Ticket is routed to the relevant team for action.
Touchpoint	Ticket submission interface.	FLOW DESIGNER classification workflow.	Assigned support team / resolution workflow.
Customer Thought	I hope my issue is recorded correctly.	I hope my ticket reaches the right category.	I want my issue resolved quickly.
Customer Feeling	Concerned but hopeful.	More confident with automatic classification.	Satisfied when routed and handled efficiently.
Process Ownership	Customer / Support Intake	FLOW DESIGNER / System	Support Team
Opportunities	Make ticket submission simple.	Improve classification accuracy and reduce manual sorting.	Speed up routing and resolution.
